(respective currency)

Currency	Commission
AUD	5
EUR	3
GBP	2.5
USD	3
CHF	4
HKD	30

F - Margin Requirements (CFD*)

Stocks / ETF – Margin requirement, depends on the instrument

Index - Variable, depending on the index.

Currencies –Margin, depending upon the currency cross (3% - 50% of the nominal value)

Commodities/Futures 1% - 10% of the trading value

* The CFD margin requirements are indicative. There may be situations in which market conditions may cause an increase in the margin requirements. If you intend to trade a specific CFD you should consult the trading conditions in your trading platform DIF Freedom.

G – Leverage Impact

G.1. CFD: Forex

The rollover in CFD Forex positions are calculated on a daily basis according to the info in Rollover of Forex positions.

G.2. CFD of ETF, Stocks, Index and Bonds

CFD Long overnight positions - cost LIBOR plus 6,5% (**)

CFD Short overnight positions - cost LIBID minus 6,5% (*)(**)

(*) – If the rate is negative, it will be excluded from the financing calculation.

(**) – Plus 4% of Stamp Duty

The upper is the max that can be charged.

If LIBID or LIBOR is negative, zero will be considered, and only spread will be applied.

G.3. Commodities CFD

In Commodities CFDs, all the costs are included in the spread.

G.4. Carrying Cost on Futures, Listed Options and Expiring CFDs

Overnight positions in Futures, Listed Options and Expiring CFDs are subject to a carrying cost.

The carrying cost is calculated on the basis of the daily margin requirement and applied when a position is held overnight. The funding rate used for calculating the carrying cost is based in the relevant Interbank-rate + markup (450 bps). Carrying Cost = Margin requirement * Holding time * (Relevant Interbank rate + markup) / (365 or 360 days)

H- Borrowing Costs on Short CFD of Stocks Overnight Positions

A borrowing cost will be applied to short CFD positions held overnight. This borrowing cost is dependent on the liquidity of the stocks and may be EUR 0 for high liquidity stocks.

The specific borrowing rate for a stock can be seen as the "Borrowing Rate" under "Account » Trading Conditions » CFD Stock/Index Instrument List" in the trading platform. When selling a CFD, the borrowing cost for holding the position overnight is shown in the CFD Trade module in the "Est. borrowing cost per day" field.

The borrowing rate will be fixed when the position is opened and will be charged on a monthly basis.
